COLLECTING BRAZILIAN COINS - A WISE INVESTMENT

ESTADOS UNIDOS DO BRASIL (The United States of Brazil) is by far the largest and most prosperous country in all of Central and South America and the Caribbean. The economy of Brazil is expanding at a pace similar to that experienced by the USA in the era of 1946-1965. New construction and refurbishing are evident everywhere. Furthermore, Brazil has abundant quantities of numerous valuable natural resources, many of which have hardly been exploited as yet.

The working middle class of the populace numbers in the millions already. Most of those persons have just recently achieved a financial position enabling them to consider expensive and opulent hobbies such as coin collecting. Their enthusiasm in obtaining one or more of the numerous local catalogues covering the coinage of Brazil is reminiscent of the USA in the early 1960's. Concomitantly, the price structure for general Brazilian coinage is similar to that of US coins in 1957-1961.

Given these factors, we feel that both the short-term and long-term appreciation potential of this coinage is perhaps the most favorable of any worldwide coinage.

The coinage is varied and generally very attractive. Many commemoratives add appeal to the modern series. Type collecting is especially interesting with the numerous approaches it allows in constructing guidelines for three centuries of coinage in gold, silver, copper and copper-nickel. For many of us, the best aspect of type collecting this series is that most of the types are so inexpensive that almost any collector of average financial means can easily assemble a substantial collection.

Over the next five years or so, we project that prices for most Brazilian coins will triple on the average. Therefore, today is the time to consider buying specimens at price levels that are intuitively "too cheap".

* * * * *

POSSIBLE GUIDELINES FOR YOUR BRAZILIAN COIN COLLECTION

Republic by Type 1889-1956. Yeoman's 11th Edition lists 77 types other than gold. Thirty of these are commemoratives. Yeoman's assessed value of all 77 is slightly less than \$1000, over half of which is for the four beautiful Discovery commemorative coins of 1900.

Empire Decimal Coinage 1849-1889. William Craig (2nd Edition) lists 22 non-gold types valued at \$66.25 (unrealistically low). Three metals and several distinctive style changes enhance this group.

Regional Coins and Counterstamps 1808-1835. Minas Gerais, Mato Grosso, Cuiba, Goias, São Paulo, Ceara, Maranhao and Para all had some local issues produced. Many are inexpensive although several are great rarities. An interesting "specialized" collection.

Bronze Coins 1729-1912. Depending on your determination of what represents a "different" type, this area can represent a large or a small group of very different coins covering nearly two centuries and many issuing authorities. Mostly they are very inexpensive.

Eighteenth Century Silver Type Collection. A basic collection would include: (1) 20, 40, 80, 160, 320 and 640 Reis of the Pernambuco Mint 1700-1701 for Pedro II; (2) 80, 160, 320 and 640 Reis of João V, Jose I, Maria I and Pedro III, and Maria I (4 coins each of 4 rulers); and (3) a 75, 150, 300 and 600 Reis of Minas Gerais featuring the large "J" 1752-1776. These would form a fascinating group of 26 types with a catalog value of less than \$1000 in Fine.

Seventeenth Centruy Silver Type Collection. From the interesting coinage of Pedro II (the first round coinage of South America), a type collection would include a 20, 40, 80, 160, 320 and 640 Reis of 3 different types: 1695 large crown series of Bahia, 1695-1698 small crown series of Bahia and the 1699-1700 series from the Rio de Janeiro Mint. This could become a complete Pedro II silver collection if the Pernambuco issues are included.

These are just a few of the many possibilities which could be used in defining your particular Brazilian collection. Date, rather than type, collecting can be pursued within each area. A little imagination and effort can provide a new facet to your numismatic activity. Those having questions can direct them either to Freeman or to our Brazilian specialist, Norbert Richter.

COUNTERSTAMPED COINAGE BEFORE 1695. The first legal coinage executed in Brazil was a counterstamp consisting of crowned numerals (= value in Reis) over Spanish (1643) and Portuguese (1663) national coinage. Many collectors of Brazilian coins do not include this series of coins due to the difficulty of authentication.

- *1 -Vinicius ("V" in later text) XVII. Crowned "250" c/s over Portuguese 1/2 Cruzado of João III. C/S of 1663-1685. Decent AVF, decidedly genuine 85.00

FIRST NATIONAL STRUCK COINAGE - Under Pedro II of Portugal

- 2 -Copper Coinage (1693-1699) XX Reis 1697 PPPP V19 large flan. Crude Fine 8.00
- 3 -XX Reis 1698 PPPP V21, scarcer type without counterstamp. Decent Fine + 15.00
- 4 -XX Reis 1699 PPPP V24, with shield counterstamp and an additional, unclassified Crown c/s above the standard one. Nice F-VF, interesting. . . . 25.00
- *5 -Silver Coinage (1695-1702) Small 40 Reis (1695) V7. First issue of Brazilian coinage distinguished by a large, wide crown. This type was discontinued early during that first year, as shown by the fact that most 1695 issues encountered are of the second type with smaller, narrower crown. F-VF, quite crude and has a small plug at 2 o'clock. RRR type 150.00
- *6 -40 Reis (1695-8) V21, style of the Bahia Mint, undated. Bold VF, crude as always. RR type without a plug or hole. Undamaged 300.00
- 7 -40 Reis (1699-1700) V55, style of the Rio de Janeiro Mint, undated. Fine +, a small plug at 10 o'clock but RR type. 75.00
- (NOTE: The above three specimens of the tiny 40 Reis silver are the first we have owned and the first we recall being offered on the U.S. market. As a set of three different types, this is a most unusual offering.)
- *8 -80 Reis 1696 V23, Scarce type. VG \$25.00; *Crude Bold VF. 75.00
- 9 -80 Reis 1701 P V92, Pernambuco Mint. Fine, very scarce type. 45.00
- *10 -160 Reis 1699 V66, Rio Mint. Attractive AVF. 34.00
- 11 -160 Reis 1701 P V105, Pernambuco Mint. Attractive F-VF, R type 29.50
- 12 -320 Reis 1695 V13, Bahia issue of the large crown type. Another example of the first type of struck coinage. Fine, R undervalued type. 37.50
- 13 -320 Reis 1695 V15. Another example of the first type with the large Crown. However, this specimen has the King's name spelled "PETRS" instead of the "PETRVS" found on later issues. We suspect this early die has a history similar to the U.S. Chain "Ameri" large cent. Probably the first (unpracticed) die used for the 320 Reis coinage of Brazil. Nice Fine +, RR 100.00
- 14 -320 Reis 1696/5 V36, Bahia issue. A very interesting overdate which combines the first and second years of national coinage together. Fine . . 24.00
- 15 -320 Reis 1699 V70, Rio Mint. Fine. 24.00
- 16 -320 Reis 1700 P V109, Pernambuco Mint's first coinage. Fine/VG 20.00
- 17 -320 Reis 1701/0 P V113, Pernambuco Mint overdate. Fine 27.50
- *18 -320 Reis 1701/1700/1699 V112, Pernambuco Mint. An interesting, triple overdate covering two centuries and two mints. AVF, certainly undervalued. 40.00
- *19 -640 Reis 1695 V16, Bahia Mint. Large Crown Type - the first crown of this country (its 38 mm diameter qualifies it as a crown by virtually any and all standards we know of.) Parallels the U.S. 1794 Dollar in importance within the coinage of Brazil. As a first issue, one-year type (struck for only a portion of that year), this crown is decidedly highly undervalued. Toned AVF 90.00
- 20 -640 Reis 1695 V41, small Crown, second Bahia type. F-VF 37.50
- 21 -640 Reis 1696 V44, Bahia Mint. Attractive AVF. 40.00
- 22 -640 Reis 1697/6 V48, Bahia Mint. Extremely bold overdate. Nearly Fine . 50.00
- 23 -640 Reis 1697 V47, Bahia. Inverted "A" for "V" in "PETRVS". AVF . . . 55.00
- 24 -640 Reis 1698 V50, Bahia. AVF 45.00
- 25 -640 Reis 1699 V76, Rio Mint. F-VF, attractive with no defects 37.50
- *26 -640 Reis 1699/8 V78, Rio. Nearly VF, bold overdate 42.50
- 27 -640 Reis 1700 P V116, Pernambuco Mint. Attractive Toned F-VF. 40.00
- 28 -640 Reis 1700/1699 V119, Pernambuco Mint overdate. AVF 50.00

MINAS GERAIS (General Mines) Issues, distinguished by a large "J". Struck in both Bahai and Rio, a small percentage was counterstamped later for validation. Issues of the Rio Mint were designed with curved horizontal lines in the globes until 1770; later issues through 1774 are a separate type featuring straight global lines. These interesting types circulated into the 20th Centruy and are often quite worn. They were also over stamped to make new coins in 1810-1817.

THE CHALLENGE OF COLLECTING COB COINAGE

Collecting the cob coinage of Potosi is a challenging task and one which should be undertaken only by the studious, industrious and persevering numismatist. Correct attribution requires close scrutiny of these odd-shaped, often-oxidized coins—coins which were often only partially struck originally. With all its difficulties and frustrations, the collecting of cob coinage will bring ultimate intellectual gratification and real excitement to anyone who masters this very formidable arena. We suspect that the type of collector who ventures into this difficult but rewarding field is of similar intellectual mentality to those numismatists of yesteryear who first studied and attributed ancient coinage. Onward! ¡Adelante!

*397	-Philip II, Assayer B. Apparently unlisted in Sellschopp (6 fleur-de-lis, commas, etc). Similar to 8 Reales of Sell. #157 - 160. Circular and mostly well struck. First Type "B" of Potosi. VF, unholed, possibly RR.	50.00
*398	-Philip II, Assayer B. "PHILPPUS" misspelling. Reverse has "M" missing after "ARV". Dot in legend rather than comma. Probably RR. F-VF.	50.00
399	-Philip II, Assayer B. Reverse lions and castles in 3 layers; possibly struck over Assayer B of earlier Type as top set of lions and castles are distinctively different than those below. Sell-164? VF, holed.	35.00
400	-Philip III, Assayer R. Sell-299. About Fine.	20.00
401	-Philip III, Assayer M. Sellschopp states that this assayer comes in the pre-dated and early-dated style. Clearly the pre-dated type with "RE(X)" where the date later appeared, thus unlisted. VG.	15.00
402	-Philip III, Assayer M. Unlisted variety with "M" over "M" - the type of error Castan observes closely. Probably 1616-1617. F-VF, holed.	25.00

*409	-Philip IV 1660E. Nearly round, 3 dates, nearly full legends. "Flavor" is not correct for period - perhaps a concoction. VF+	50.00
410	-Philip IV 1665E. 2 1/2 dates, "PHILIPUS" fully readable. Fine.	27.50
411	-Carlos II 1667E. 2 1/4 dates. Scarce first date of this monarch. Fine +.	35.00
